

Spider Adaptations

Instructions

You will need

200 gsm cardboard
Colour pencils
Scissors
Sticky tape
Straws (cardboard is better for the environment)
String or wool

What to do

1. Colour in and cut out your spider.
2. Cut two small pieces of straw about 3cm long.
3. Stick the two pieces of straw to the back of your spider with sticky tape.
4. Once your two pieces of straw are attached, thread some string through one straw piece and then back down through the other.
5. Place a friend's finger through the loop of string.
6. Turn your spider over and pull the bottoms of the string out and away from each other.
7. Your spider should climb up its web to your friend's finger!
